OLUWAFERANMI IDUNUOLUWA

Domain in Mobile development & Backend systems

PROFILE

Mobile Developer since late 2025 with basic knowledge in Backend experience since mid 2026. I've built 5 mobile apps , 1 listed on Google play store and also been putting max effort learning backend through system design.

EXPERIENCE

TestFlow – Software Engineer

2026-present

- Built Testflow from scratch and it services across web and mobile
- Built and Maintained with over 30,000+ CBT sessions with 2000+ active users.

Tech: react, express, flutter, redis, monogodb, argon2id, docker, git actions CI/CD.

ECOVEST - Software Engineer / Co- founder

2026- present

- Built pocketa's backend a product of Ecovest to manage spending expenditure on a FASTAPI and a Flutter mobile client.

Tech: fastAPI, flutter, postgreSQL, redis, argon2id, Docker, Git Actions CI/CD.

GDG OAU Mobile Development Lead

2026- 2027

Currently Leading OAU GDG Community

SELECTED PROJECT

- **MAILX:** Built an SMTP server from scratch in GO wrapped it up with a versioned SDKs (<https://github.com/Ferousco-dev/mailx>).
- **HOLIBRARY:** An online library management system backend SEN106. and architected a GO backend with a modernised OPAC system.

EDUCATION

Obafemi Awolowo University

B.Sc. Software Engineering

2025-2030

SKILLS

Languages: Dart, Kotlin, JavaScript, Go, Python,SQL.

Mobile: Flutter, Kotlin, Swift, Dio, Provider, NFC.

Backend: Go, Node.js, FastAPI, REST API design, Background Workers.

DATA: PostgreSQL, MonogoDB, Redis, Sqlite.

DevOps & Infrastructure: Git Actions CI/CD, Docker.

Observability & Security: Sentry, JWT Sessions, Argon2id.

AI & Intergration: Claude, OpenAI, Gemini, Apify, Voice agents, Shoplify, Firecrawl, Kie.AI.

Payments: Paystack, Stripe.

AWARDS

1st Place - Payaza Hackathon (May 2026)

1st Place - Enoch's Hub Hackathon (June 2026)
